CUSTOM DIMMING PROFILE

This luminaire supports both 1–10 V and DALI dimming, enabling smooth and reliable adjustment of light output to suit different applications or energy-saving requirements. By integrating with compatible lighting control systems, the brightness can be easily tuned from full output to lower levels while maintaining consistent performance.

- 1–10 V dimming: Simple analog dimming for straightforward control.
- DALI dimming: Digital, programmable dimming for advanced lighting management.

This feature is ideal for façades, architectural highlights, and outdoor areas where lighting levels may need to be adjusted throughout the evening, enhancing visual comfort while reducing energy consumption.

TILT LIMITER

Note: DarkSky Approved when mounted in the downward position only

The tilt limiter ensures that the luminaire cannot be adjusted above 0° (horizontal).

- Restricts adjustment above **0° (horizontal position)**
- Integrated **mechanical tilt-stop mechanism** for reliable angle control.
- Secure **locking mechanism** prevents unintended movement.
- Supports DarkSky-friendly lighting applications.

SURFACE MOUNT INSTALLATION STEPS

1. Fix the Mounting Bracket:

Install and secure the mounting bracket to the surface using suitable fasteners.

2. Fixture Mounting:

Mount the luminaire onto the bracket and secure the fixture to the Surface for direct illumination as required.

SHORT STEM MOUNT INSTALLATION STEPS

1. Fix the Pole plate:

Mount the bracket, secure it to the Stem using screws.

2. Mount the light:

Attach the luminaire to the mounting bracket and secure it using the supplied Allen key.

POLE MOUNT INSTALLATION STEPS

1. Fix the Pole plate:

Mount the bracket plate, secure it to the Pole using screws.

2. Mount the light:

Mount the luminaire to the bracket and tilt it downward to direct illumination where required

SIDE POLE MOUNT INSTALLATION STEPS

1. Fix the Side Pole plate:
Install and secure the side pole mounting plate to the pole using the supplied fasteners.

2. Mount the light:
Attach the luminaire to the mounting plate and secure it using the supplied Allen key.

WALL MOUNT INSTALLATION STEPS

1. Fix the Wall plate:
Install and secure the wall mounting plate to the surface using appropriate fasteners

2. Mount the light:
Attach the luminaire to the mounting plate and secure it using the supplied Allen key.

POLE CLAMP MOUNT INSTALLATION STEPS

1. Fix the Mounting Bracket:
Secure the bracket firmly around the pole at the desired height.

2. Fixture Mounting:
Mount the luminaire onto the bracket and secure it using the supplied Allen key as required.

MOUNTING METHODS AND ACCESSORIES

(SUM) Surface Mount

Directly installed on a solid surface, providing stable downward illumination for landscape and architectural lighting.

(STM) Short Stem Mount

Mounted on a short stem to slightly elevate the luminaire for improved beam clearance.

(PTM) Pole Top Mount

Installed on top of a pole, delivering elevated and controlled downward illumination.

(SPM) Side Pole Mount

Mounted on the side of a pole using a rigid arm bracket..

(WAM) Wall Mount

Fixed onto vertical surfaces to provide focused downward lighting for façades and features.

(PCM) Pole Clamp Mount

Clamp bracket enables secure pole installation without drilling, ensuring flexible positioning.
